Ergotec® saddle chairs

An Ergotec® saddle chair helps maintain an ergonomically good posture with a straight back. You use your legs naturally to move around with the chair while you sit on it. Its easy to change position and you have hands and upper body free for work.

A saddle chair is especially suitable for dental workplaces and if you for example choose the chair with our Swing mechanism, you will have full freedom when leaning over the patient. The seat will follow your bodys movements which relieves pressure on nerves, muscles and ligaments. It helps to increase blood flow in the muscles and prevents back problems.

Our most popular saddle chairs are:

- **Futura** – This seat is short, narrow and extra soft
- **Dynamic** – This seat is small, extra soft and very comfortable
- **Calypso** – A bigger and wider seat and still extra soft.

The chairs can be adapted in a variety of ways and everything is created according to your wishes at our factory in Denmark.

Ergotec® Support chairs

Our Support chairs are comfortable and compact without sacrificing ergonomics. The design helps you to quickly and easily sit down and get up.

Ergotec® Support chairs are perfect for use in par example hospitals in examination rooms, Sugery, laborato-ries and clinics where there is a need to be able to move and adjust the chairs quickly.

If You choose the chair in “OP version” with footcontrol, you can easily adjust the height without having to use the hands. This is especially good for work situations where you need to be sterile or want to adjust the height frequently.

We recommend upholstery with artifi-cial leather as it is sturdy and easy to clean. You can choose between more than 30 different colours.

Accessories – the details that makes Your chair personally perfect.

We are all unique at work, so its important that the chair is adapted specially for you and the working situation. Our accessories are created to give you “the perfect chair”.

You can par example choose different armrests, extra hygienic castors or foot release for easier height adjustment while staying sterile.

Ergotec[®] laboratory and Cleanroom chairs

Our chairs designed for laboratories, medical production and cleanroom environments meets the requirement for high hygienic standards. They are very easy to clean and you can also have them in a Cleanroom ESD version. Our upholstery is, among others, urine, blood, mould and mildew resistant.

The backs and seats are made in moulded or cold foam which ensures you very comfortable seating, and at the same time, it makes the chair very durable.

If “only the best is good enough for you” – please take a look at these chairs.

Quick delivery

All chairs are on stock in the colours black, blue and grey.
Other colours will be ready within about 14 days.

Ergotec Lab 1 and 2 chairs

Is a range of high-end laboratory chairs. The backs and seats are identical in shape, but the Lab 2 version has a larger back and seat.

You can choose between 6 different seat heights and its possible to add accessories as armrests, footring, extra hygienic castors or gliders.

Cleanroom ESD 1 and 2 chairs

Cleanroom ESD 1 and 2 are very comfortable chairs and promotes an ergonomic sitting position, supporting the natural S-curve of the spine.

The backs and seats are made in antistatic artificial leather and helps dissipate static electricity.

Dental 1 and 2 chairs

Dental 1 and 2 are chairs with a special designed seat cut-out. That allows clinic staff to sit close to the patient or colleague during treatments.

The chairs are ideal for long time sitting in the same position – the rounded front edge of the seat ensures good blood circulation of the legs.

Chairs for industrial environments

The Pluto PU and Lab Integral chairs are manufactured in a very robust quality that can withstand wear and tear from dirt, water, chemicals and so on.

Pluto PU is a practical small and durable chair. The backrest also functions as a handgrip – very easy to move the chair.

Lab Integral has a bigger backrest and seat – both are made in moulded polyurethane foam.
